Sprint 4 Retrospective

Damion:

    DB cleanup.   → tedious but
                              important.

    → enables proper testing.

- To much UI concerns (wasted test time)

Rebecca:

    Split between Story / testing
        for work productivity.

- [Bugs vs. Testing]

Knowing how to test w/ Jest,
asynchorisity
huge obstacle.
Compounded non-testing -
Great to have plan now!

Thabang:

- non-testing compounded problems
- nesting of functions in front-end makes testing difficult.

    — Suggest 2 testing.

    — 1 person refactors controller code.

    — 2 testing

    — 1 bug fixes.

DB   →   Damion

Routing   →   coveralls.   Tyson

non - min

jquer → remove [jest]

$$\frac{19 + 13 + 21 + 4}{4} = \boxed{14.25}$$

[Sprint Velocities]

$2 + 2 + 4 + 3 + 4 + 4 = 19$

$3 + 1 + 4 + 2 + 3 = 13$

$3 + 2 + 4 + 6 + 4 + 2 = 21$

Sprint 1 : 19

" 2 : 13 → 16

" 3 : 21 → 17.6

" 4 : 4 → 14.25

= 3 3.35
